BARRIER® is an extensive range of single-use medical devices for use in the operating room, such as surgical drapes, gowns, face masks, headwear, XRD products, scrub clothing and other protective apparel.

All BARRIER products comply with the demands stated in the Medical Device Directive and carry the CE mark, as well as complying with the Quality System Regulations of the US FDA. In these regulations a number of essential requirements are described. The requirements relate to design, production and packaging of the products and contain conditions regarding safety, chemical composition, physical and biological properties and labelling. This assures you that the BARRIER products are safe, fit for use and offer optimum protection.

At Mölnlycke Health Care we are dedicated to creating peace of mind in the operating room. Our BARRIER range is a perfect proof of this.

## THE RIGHT PERFORMANCE IN THE RIGHT PLACE

Bacteria that are spread to the surgical wound from the patient's skin cause a large number of postoperative wound infections. The role of patient drapes is to block this transfer. Our drapes do exactly that job.

Our Universal Set solutions are flexible and can be adjusted to meet most surgical needs. Through our zone draping system BARRIER offers enhanced performance in the critical area through a special reinforcement material that adds strength and fluid control just where it is needed.

The BARRIER Universal Drapes from Mölnlycke Health Care are simply easy-to-use draping alternatives with superior infection control.

## **DETAILED SECURITY FOR EVERY SPECIALITY**

The operating room is often a very stressful environment where a lot of factors have to work in harmony so the surgical team are able to perform at their very best.

At Mölnlycke Health Care we are dedicated to creating peace of mind in the operating room and our comprehensive range of BARRIER drapes and sets is a perfect proof of this. There is a vast range of all-in-one designs to accommodate any surgical speciality. They are all quick and easy to drape thanks to their smart foldings and self-explanatory instruction labels.

Many of our speciality specific drapes have different integrated solutions such as pouches, cord holders, elasticated fenestrations and non-slip pads. All functions are there to enable the professionals to focus on what they do best, every day.

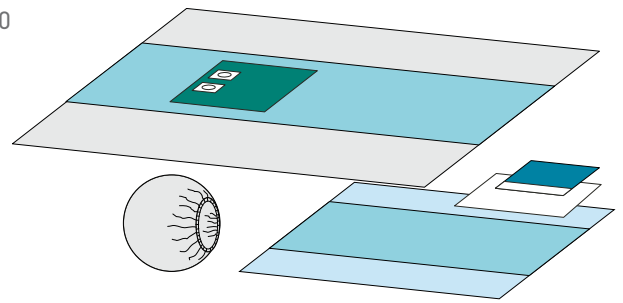

## ANGIOGRAPHY SETS AND DRAPES

**ANGIOGRAPHY SET**

**RECTAL DRAPE**

84521220

/40

- 60x85 cm, aperture 5,5x8 cm, finger cot

## **UNCOMPROMISING COMPLEMENTS WHEN IT IS NEEDED**

In a number of cases, single packed products are needed as a complement during surgery. For that purpose BARRIER offers a wide range of single-use solutions such as mayo stand covers, table covers, incise drapes and pouches.

Equipment such as microscopes, probes, cameras, C-arms, etc can be difficult and sometimes impossible to sterilise. BARRIER offers a full range of sterile, transparent drapes and provides an efficient infection control without compromising the use of instruments.

## **NEW BARRIER GOWNS DESIGNED TO LET YOU PERFORM AT THE HIGHEST LEVEL**

Surgical gowns not only prevent infection of the surgical wound. They must also protect the operating team from liquid contamination.

BARRIER surgical gowns offer different levels of protection, covering the needs of less invasive operations with fluid repellent material to wet surgery with plastic reinforced front, impermeable sleeves and seams. The toughest conditions can be met with a gown that is impermeable all over.

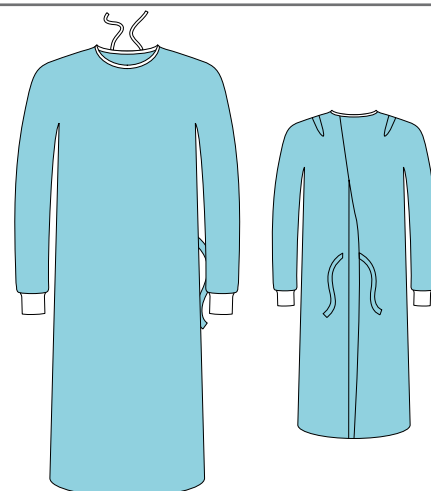

A new level of comfort and personal protection.

- The new BARRIER surgical gown range is the widest and most comprehensive range of advanced single-use surgical gowns
- Ergonomically tailored for improved freedom of movement
- Easy-access sterile packaging with easy to follow labelling

BARRIER surgical gowns also provide a high level of personal comfort with high breathability and air permeability.

## **WHAT YOU WEAR CLOSE TO YOUR SKIN NEEDS TO BE FRESH AND COMFORTABLE**

BARRIER offers a range of single use scrub suits and warm-up jackets that provide the comfort and quality of wearing fresh clothes every day. The scrub suit range has modern designs and four quality levels; basic, standard, special and unisoft. Warm-up jackets provide additional comfort and warmth when needed.

The BARRIER clean air suit reduces the flow of skin carrying bacteria from wearer to the theatre air. The ideal solution for infection prone procedures and operations on immune compromised patients.

## A SAFE CHOICE

All types of foreign body represent a potential risk of infection in the operating wound. Therefore it is of critical importance that the clothing of the operating team actually covers the body parts that pose the greatest risk. The head - and especially the hair - is one of these parts.

BARRIER offers a wide range of headwear in different styles and fits, covering requirements for any type of operation, any shape and size of head and any hairstyle.

## THE QUALITY IS IN THE DETAIL

The skin area around the mouth and nose is one of the most sensitive parts of the human body. In a healthcare setting, where facemasks are used for many hours on a daily basis, comfort is key to product acceptance.

BARRIER facemasks are made from highest quality materials. They offer the best possible filter efficiency, the lowest breathing resistance and optimize cup shape. Maintaining a proper cup shape is important for keeping the mask away from the user's lips during use to minimize contact between mouth and facemask. This will prevent possible fluid strike through and the subsequent transmission of microorganisms from inside to outside.

## YOU CAN NEVER BE TOO SECURE

BARRIER provides a supplementary range of protective clothing for the safety and comfort of hospital staff, patients and visitors.

Protective clothing like glasses, aprons and isolation gowns provide extra protection to the hospital staff. Patient clothing provides comfort and integrity to the patient in a sometimes stressful environment.

Finally, BARRIER enables visitors to meet with the patient before and after surgery in a controlled way.
